

Year 3-4 week ending 13.10.22

English: In English this week we have been collecting facts on the world's use of plastic and its effect on marine life. These facts will be used to write our non-chronological report.

We have also been investigating some tricky vocabulary as we will be using technical words in our report.

Our science topic is drawing to a close for this half term, however we have enjoyed investigating what states of matter are and how they change! We have enjoyed being particles and were a bit worried when Mrs Ellin was shaking up big bottles of fizzy pop!

We can now explain how water changes state and the best place to dry our washing!

Numbers, numbers and more numbers have been our focus in maths.

Discovery Friday has helped us to investigate our numbers and how we can manipulate them.

Bamboo bamboo has been a huge success and the children have been stars. Mrs Ellin has been immensely impressed with their concentration and application leading to unbelievable progress – well done everyone.

History is also drawing to a close this half term.

The children have learnt about the invasion of the Anglo-Saxons, their way of life and how their language still impacts on us today.

Our investigation of artefacts led to some interesting, and sometimes humorous hypotheses.
