

# Year 3-4 week ending 3.3.23

English: Imperative verbs began our week as we start to investigate what makes a good set of instructions. We have been practising how to give instructions. We have looked at lots of examples of instructions finding out what makes a good set of instructions as well as what makes a bad set of instructions.

Metres, centimetres and millimetres have challenged us this week. We have measured, drawn lines, converted and solved problems. Perimeter was tricky at the start and year 4 have a very puzzling end to the week as we onto finding the area of our shapes.

We had an amazing session with Newcastle Falcons this week – learning lots of new skills and the benefits of exercise.

What makes sound? This was the starting point of our new science topic. We have looked at how sound is made. We have investigated the pitch of sound and how it can vary.

Investigation of volcanoes was the start of our geography topic on our dangerous world. We have identified where volcanoes are in our world and marked them on a map.

We have also learnt some facts about volcanoes in the world such as their height and when they last erupted.

We listened to a violin looking at how the violinists' fingers moved and how the sound changed.
