

Year 3-4 week ending 10.2.23

English: Hercules is the focus of our writing this half term. Plan completed this week as we lead into writing our narrative. We have planned our opening sentence and powerful adjectives to be included – writing next week!

Volleyball has continued to be great fun. It is improving our ball skills and encouraging us to think ahead.

Teamwork is essential to our success as we support each other.

Please continue to practice times tables, through rock stars, super movers or your games – it's so important and makes a huge difference to our learning in maths.

Fractions have continued to be very tricky this week!

Equivalent fractions made a challenging start to our week as we used paper strips to show our fractions.

Year 3 have done some amazing work on comparing fractions and the importance of the denominator.

Year 4 have investigated decimals and what they represent. We have looked at the relationship between fractions and decimals.

Another busy week!

Eucharist is the focus of our new RE topic. We have begun to investigate the scripture and how it links to our service at mass.

We are beginning to look at the symbolism involved in mass and the importance of it.
