

# Year 1/2 Blog

## Week ending 10.2.23

We've been very busy this week! Our new class book is Solomon and Mortimer, a story about two mischievous crocodiles, who set out to scare the river's biggest hippo. As well as learning the story, we have been creating some fantastic crocodiles out of clay; we have been feeding crocodiles specific phonics sounds and we have made our own swamp scene in our play area.

We are exploring another part of our measuring topic this week: time. Before we move onto o' clocks and half-pasts, we have been looking at the days of the week and the months of the year - and we have come up with some catchy songs for both!

Sorting the months of the year using our lovely song!

In Geography, we have been comparing our city of Newcastle with the city of Varanasi in India. We compared the buildings, the bridges and the animal-life and found that there many differences between the two places.

In Science, we have started to look at the human body. We started out naming the body parts we already knew, and then learnt about parts that we did not know at all, like the abdomen, the thigh and the calf. Some children learnt about the internal organs of the body, and even made playdough versions of the organs in teams!
