

Year 5/6 Week ending: 27/1/23

This week we moved onto measurement.

Converting measurements was a lot easier when we realised, we could use our skills of multiplying and dividing by 10, 100 and 1000.

We also recorded the rules in our maths notebooks.

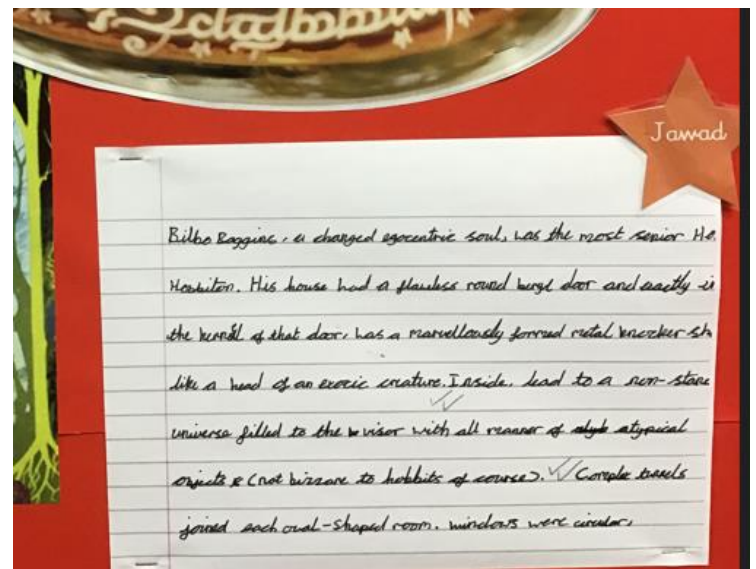

Topics this week:

Our world - Our Impact

Living Things and Their Habitats

Year 5/6 have produced some great writing this week when writing their openings to a fantasy story.

The adults in the room have had to work extra hard to conceal any spoilers due to many enthusiastic children!

In geography, it was time for a class debate! We looked at the advantages and disadvantages of renewable energy as a source of electricity. We organised our arguments for and against in groups before fighting our case.

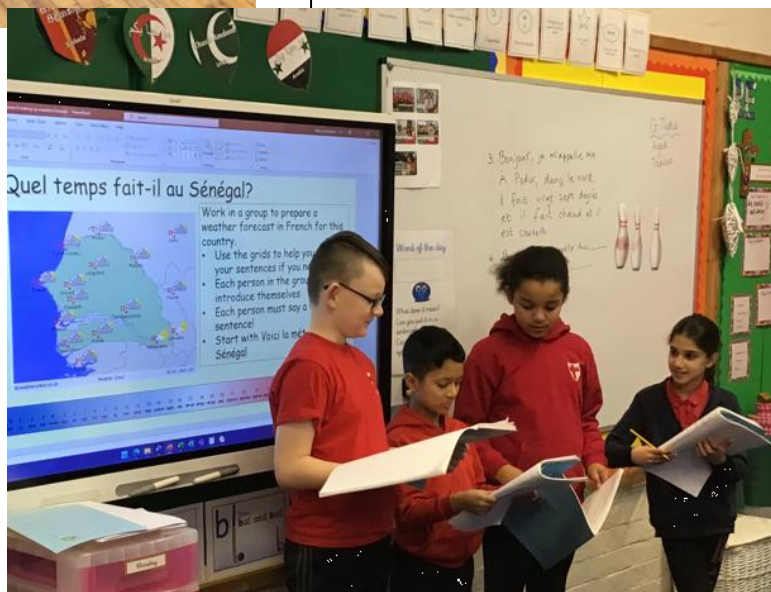

PE with Apex was the task of sitting volleyball.

French

Year 5 and 6 worked in small groups to prepare a weather forecast for French speaking countries. Bravo! Wonderful group work and speaking.

In PSHE, Mrs Cafferkey discussed different coping mechanisms they use or could use if they are feeling stressed or overwhelmed.

They had to work together as a team to release themselves from a human knot.
