

Year 5/6 Week ending: 2/12/22

Year 5/6 have continued to tackle fractions.

We realised that although comparing and ordering fractions with different denominators is a lot of steps, it is just a step up from finding equivalents.

Topics this week:

Trade Past and Present
Animals Including Humans

Finishing their diary entries this week, Year 5/6 produced some great work.

After continuing the story of Great Expectations, they took part in a book talk session sharing: likes, dislikes, puzzles and links.

The passion was clear to see from all!

In the lead up to our Christingle Service, we reminded ourselves of the true meaning and symbolism whilst creating our own Christingles.

In science, we took part in a class survey collecting evidence on our favourite sports.

After looking at the benefits of exercise we created persuasive posters to encourage regular exercise.
