

Year 5/6 Week ending: 9/12/22

Adding and subtracting fractions has been a tricky yet engaging task.

We were all able to add and subtract fractions with different denominators and some of us also tackled addition and subtraction of mixed numbers and improper fractions.

In English, Year 5/6 planned and published some great descriptive openings about Miss Havisham and her eerie home.

The children are extremely eager to finish the book and watch some more film clips.

Topics this week:

Trade Past and Present

Animals Including Humans

Year 5/6 were visited by a member of: The Royal National Lifeboat Institution.

They were able to study and spot hazards and find out some tips and real-life stories about their role in saving lives and keeping people safe.

A main message was if struggling in the water using the float technique.

Also, if you think someone needs help never hesitate to ring for help.

They would rather a wasted journey than a life gone unsaved

Science this week was looking at food as a source of energy and how to get a healthy balance.

PE - a mix of aerobic games and keep fit.
